The electric fuel pump is submerged in fuel inside the tank, attached to a module or hanger assembly that also includes a float and sending unit that supplies fuel level information to the dash gauge. A strainer is attached to the pump to filter the fuel. The strainer is your fuel system's first line of defense, and if it fails or becomes clogged, the pump can be damaged and/or fuel pressure

## **Diesel Fuel Injection**

FSI stands for "Stratified Fuel Injection", which is Volkswagen Group's direct injection system. The FSI system is based on a high-pressure fuel pump, a fuel rail and solenoid injectors. It is similar to the Common Rail injection used in modern diesel engines but operating at 110 bar instead of 1500+ bar.
