HP Inkjet printers - Printhead errors | HP® Customer Support
A printhead can become dirty after it has been sitting idle for a period of time. It's recommended that you perform a few print jobs each month in order to maintain print quality and to keep the ink from drying in the cartridges. However, even if you print a few times a week, you may still find yourself dealing with HP printhead problems.

Further to my previous answer 3 days ago on a MG5650 that the printer is now working, I have removed the B203 message, but now all the pages are blank. Ink is getting into the printhead as the cartridge levels are reducing. I have removed the printhead and cleaned it to flush out the ink, but the pages are still blank. Do I need a new printhead?.
