### **Pureflow Airdog / Diesel RX**

The solution for diesel performance is the AirDog® Fuel Preparator®. It is the only filtration delivery system that separates air from the fuel, as well as water and particulates. This fuel system maintains the proper pressure flow to the transfer pump, eliminating cavitation and vapor. The Fuel Preparator significantly improves diesel engine performance and is one of a very few aftermarket performance modifications to be CARB certified and approved for sale and use in California.

enter the injection system, thereby restoring optimal diesel fuel system performance, sending a supply of pure fuel, with no air or other contaminants, to the engine under positive pressure.

### **Solution | Fuel Injection | [airdogdiesel.com](http://airdogdiesel.com) | AirDog**

The AirDog® integrated fuel pump works as a lift pump, drawing fuel from the tank, relieving the burden of “draw” on the engine transfer pump, and feeding the engine pump with adequate positive pressure. The AirDog® prevents vapor from forming in the delivery system by feeding appropriate positive pressure to the engine’s system.

The AirDog™ replaces the Cummins factory lift pump and filter system, and enhances the fuel delivery of the Powerstroke and Duramax with a commercial duty system. Your highly modified diesel engine demands higher fuel flows. Yet, high fuel flows increase agitation in the fuel tank and fuel temperatures, producing cavitation at the lift pump.
