### Coh-Metrix version 3.0 indices - University of Memphis

Basic Elements of the Mind. According to the CAT (CAT; cf., Barrett, 2006a; Lindquist, 2013), the basic elements that contribute to emotions (and other mental states) are representations of sensations from inside the body (known as affect), representations of sensations from outside the body (known as exteroceptive sensations), and concept knowledge used to make those sensations meaningful in ...

### The role of language in emotion ... - PubMed Central (PMC)

It has been suggested that instances of emotion categories arise from the dynamic interaction of wide-scale brain networks (see, e.g., Barrett and Satpute, 2013; Kleckner et al., 2017) and, indeed, the aforementioned role of DMN in sustained transmodal associations makes it a good candidate for supporting this interaction (Barrett, 2012).

### Classification of emotion categories based on functional ...

Urine has long been a "favored" biofluid among metabolomics researchers. It is sterile, easy-to-obtain in large volumes, largely free from interfering proteins or lipids and chemically complex. However, this chemical complexity has also made urine a particularly difficult substrate to fully understand. As a biological waste material, urine typically contains metabolic breakdown products ...

Good pedagogical practice has a theory of learning at its core. However, no single best-practice e-learning standard has emerged. This may be unlikely given the range of learning and teaching styles, the potential ways technology can be implemented and the ways in which educational technology itself is changing. Various pedagogical approaches or learning theories may be considered in designing ...

In biology, homeostasis is the state of steady internal, physical, and chemical conditions maintained by living systems. This is the condition of optimal functioning for the organism and includes many variables, such as body temperature and fluid balance, being kept within certain pre-set limits (homeostatic range). Other variables include the pH of extracellular fluid, the concentrations of ...
