#### GITE14

Since chlorophyll a & b reflect the blue-green spectrum, the green color will mask the orange-red spectrum reflected by the carotenoids. In the fall, as the trees prepare for winter, the production of chlorophyll a & b is decreased but the carotenoids levels stay the same and will be greater than chlorophyll a & b.

Metaphors in biology are often encountered in the description of cell structure and function. Describing the cell as a "city" is a case in point as it offers a good opportunity to get students thinking about the structural and functional details of their knowledge as well as to require them to "think outside the box."
