Chapter 3 Productivity Improvement Techniques

Agricultural productivity is measured as the ratio of agricultural outputs to inputs. While individual products are usually measured by weight, which is known as crop yield, varying products make measuring overall agricultural output difficult. Therefore, agricultural productivity is usually measured as the market value of the final output. This productivity can be compared to many different ...

Agricultural productivity - Wikipedia

The role of benchmarking in process improvement is similar to that of the Six Sigma 1 process improvement methodology. The Six Sigma methodology comprises five integrated steps: define, measure, analyze, improve, and control (DMAIC). These steps are also central to the benchmarking process defined in this chapter.
