3.5 Positioning Patients in Bed Positioning a patient in bed is important

for maintaining alignment and for preventing bed sores (pressure ulcers), foot drop, and contractures (Perry et al., 2014).

3.5 Positioning Patients in Bed – Clinical Procedures for ...

The approach to exercises varies from chapter to chapter; many chapters

include only a single, straightforward application problem, while a few others dig a little deeper. Consistency rating: 4 While not inconsistent per se, the text introduces a fair amount of terminology and notation that it then does not continue to make use of.
