Jodie S. Holt, in Encyclopedia of Biodiversity (Second Edition), 2013 Abstract. Herbicides are used in agricultural and wildland ecosystems to reduce the density of weeds and promote the growth of desirable species. Use of herbicides in agroecosystems may change composition of weed populations. In wildlands, herbicides may increase the diversity of native species.

Herbicides - an overview | ScienceDirect Topics

More recently, urbanisation has significantly altered ecosystems (Cross-Chapter Box 4 in Chapter 2). Since around 1850, about 35% of human-caused CO₂ emissions to the atmosphere has come from land as a combined effect of land degradation and land-use change (Foley et al. 2005 14) and about 38% of the Earth's land area has been converted to ...
