Chess: Be the king by Ray Stone

The King The king is less powerful than almost every chess piece, but it is also unique: the king is the only piece that can never be captured! If a king is attacked, it is in " check." At the beginning of the game, the white king starts on the e1 square, and the black king starts on e8.

Chess King - Value and Movements - Chess.com

The king is the most important piece in the game of chess. If a player's king is threatened with capture, it is said to be in check, and the player must remove the threat of capture on the next move. If this cannot be done, the king is said to be in checkmate, resulting in a loss for that player. Players cannot make any move that places their own king in check. Although the king is the most important piece, it is usually the weakest piece in the game until the game's ending phase. Each player be

King positions []. King position is one of the most important things in chess (technically, it is the most important thing in chess). This is for the simple reason that no matter how much material advantage you have, no matter how much central control you have, no matter how weak your opponent's pawns are, if you are checkmated, all of these advantages are moot.
