Call us now on 0845 3704660 to enquire about a refurbished Commander SK. Upgrade. In 2013, the Unidrive SP and Commander SK were replaced by a new range of industrial AC drives called Unidrive M. Unidrive M's design is based on the success and popularity of Unidrive SP and Commander SK, and incorporates market-leading technologies.

## Commander SK Diagnostic Status Error and Trip Codes ...

The option module is identified by the drive by an option code. The drive stores the codes of the modules fitted when the drive parameters are saved. The stored codes are compared with the codes from the option modules at power-up. If a module is not present, but a code is stored in drive EEPROM to indicate that it should be fitted the drive ...

Commander SK HF Fault Summary . These HF (Hardware Fault) trip codes are internal to the Drive and are typically not caused by the customer. Sometimes an HF fault may occur as a result of a high electrical noise spike or vibration shock. Often, if the Drive is powered down for 1 minute and back up, the trip may be cleared and the Drive will run as
