Computer Architecture | Coursera

Basic computer (system) architecture refers to the structure of a computer system and comprises its hardware, firmware, and software. The CompTIA A+ certification exam covers computer architecture in depth and is an excellent way to prepare for this portion of the CISSP examination.

Computer Architecture and the CISSP Exam - dummies

An instruction set architecture (ISA) is the interface between the computer's software and hardware and also can be viewed as the programmer's view of the machine. Computers do not understand high-level programming languages such as Java, C++, or most programming languages used. A processor only understands instructions encoded in some numerical fashion, usually as binary numbers.
