Linear algebra is the branch of mathematics concerning linear equations such as: $+ + =$, linear maps such as: $(, \dots) + +$, and their representations in vector spaces and through matrices.. Linear algebra is central to almost all areas of mathematics. For instance, linear algebra is fundamental in modern presentations of geometry, including for defining basic objects such as lines, planes and ...

In mathematics, the kernel of a linear map, also known as the null space or nullspace, is the linear subspace of the domain of the map which is mapped to the zero vector. That is, given a linear map $L : V \rightarrow W$ between two vector spaces V and W , the kernel of L is the vector space of all elements v of V such that $L(v) = 0$, where 0 denotes the zero vector in W , or more symbolically:
