The economics of healthcare 3 Healthcare is not the only good or service in the economy that departs from the standard model of supply, demand, and the invisible hand. (Recall our discussions of externalities and monopoly.) But healthcare may be the most important good or service that departs so radically from this benchmark.

The Economics of Healthcare - Harvard University

Applying economic thinking to an understanding of resource use in patient care is challenging given the complexities of delivering health care in a hospital. Health-care markets lack the characteristics needed to determine a "market" price that reflects the economic value of resources used. However, resource allocation in a hospital can be analyzed by using production theory to determine ...
