Excavation Construction - Wollam Construction

Large sites are not usually dug out entirely, although a moderate-sized round barrow may be completely moved by excavation. Whatever the site and the extent of the excavation, discovery or location is typically followed by surveying and mapping, site sampling, and the development of an excavation plan.

excavation | Description, History, & Facts | Britannica

An excavation is any man-made cut, cavity, hole, trench, or depression made in the earth's surface by the removal of soil. Workers in excavations can be exposed to cave-ins, engulfment, hazardous atmospheres, and falls. Excavation safety training and procedures prevent serious injuries and accidents. Before work on an excavation can begin, surface hazards such as unstable buildings, sidewalks, etc. that could endanger employees must be secured or removed.
