Ford 351 Engine Weight

Ford offered two versions of the 351 engine, a Windsor 351 and a Cleveland 351. The Windsor motor is considered a small block. The Cleveland 351 is between a small block and a big block. Even though the Cleveland 351 came from the small block family, few parts will interchange. The heads on the 351 4 barrel engine were very similar to the Boss ...

351 Engine Specifications, Cleveland, Windsor, Boss ...

The Ford 351 Windsor was first introduced in 1969 and was quite a breakthrough in regards to the ways Ford produced its V8 engines. When Ford introduced the 302 to replace the 289 the engines were very similar and even used the same pistons.. The 351 Windsor was in a league of its own because of its heightened deck block, larger connecting rods and much "beefier" main bearing caps.

Ford 351 Windsor V8 Engine Specs, Firing Order and ...

The Ford 351W was an engine developed by the Ford Motor Company. Many of the 351W engines were produced in the Ford factory located in Windsor, Canada. Ford began manufacturing the engines in 1969 and continued using the engine in Ford vehicles until 1995. The Ford 351W was used in a variety of vehicles, from the Mustang to the F350.

Ford 351W Specs | It Still Runs

The engine block, intake manifold and cylinder heads are made of cast iron, with the block, manifold and heads contributing to a total average engine weight of 510 lbs. The intake manifold on the 1969-76 351 Windsor is held to the cylinder heads with 16 bolts.

Specifications for a 351 Windsor Engine | It Still Runs

A year later, the 351 high output(W HO) was offered and with 210 horsepower it was the most powerful engine available in a Ford truck next to the 460 Big Block, and the 351W HO was the most powerful engine available in the F150. The 351W offered 150 and 210 horsepower until 1985 when the lower powered 351 was discontinued.

Ford 351 Cleveland V8 Engines - Specs and Information

The 351 Modified and the 400 which was introduced since 1971, are virtually identical with very few exceptions. Wikipedia's Ford 335 engine article indicates these 2 blocks are nearly identical, too. Australia manufactured the 351 Cleveland and derivative "302" Cleveland at Ford Australia Engine plant in Geelong, Victoria, Australia from 1975-'81.

Ford engine specifications - Crankshaft

However, the only true "Windsor" engine is the 351-ci raiseddeck small-block Ford introduced in 1969 as a response to the cubic inch race going on in Detroit. Although the 221/260/ 289/302 engines were all manufactured at Ford's Cleveland engine plant, there are crossovers that required clarification.

Ford Small-Block Engine Parts Interchange Specifications

Let's spare the drama and get to the results right away. Starting with a bone-stock 351W truck engine, we bored the block 0.020-inch over, fitted KB flat-top pistons to the stock crank and rods ...

Build A 505HP Ford 351 Windsor - Hot Rod

A final advantage that many Ford enthusiasts point out is the ease of access when working on many of the parts of this engine. This is very much unlike today's engines where even the simplest of tasks can take hours because the part can't be accessed directly. 351 Windsor Performance Specs

M-Block 351M/400 Specifications - The Ford Torino Page

The Ford 335 engine family was a group of engines built by the Ford Motor Company between 1969 and 1982. The "335" designation reflected Ford management's decision to produce an engine of that size (335 cubic inches) with room for expansion during its development. This engine family began production in late 1969 with a 351 cu in (5.8 L) engine, commonly called the 351C.
