1. Preliminaries. The connectives of the formal languages of propositional logic are typically expected to exhibit salient features of the sentence-connecting devices of natural languages, and especially such devices as are regarded as items of logical vocabulary (and, or, not, if-then,...), though it will be no part of our concern to inquire as to what their 'logicality' consists in.

Sentence Connectives in Formal Logic (Stanford ...

A formal region is an area that has officially recognized boundaries defining it. As such, formal regions are often made up of the boundaries for cities, counties, states, and countries. These regions are often regarded as common knowledge and their boundaries set by local or national governments. Various criteria are used to create the regions.
