Best Rockhounding Sites in Utah & What You Can Find

Garnet Hill is the only designated rock hounding area in the Ely District, an internationally known site for gem collectors looking for garnets. Here you may find the ruby red semi-precious gems in the rocky volcanic outcrops. Garnets can be found either through careful rock breaking or searching the surface and drainages for the dark colored ...

Garnet Hill | Bureau of Land Management

When you crush a rock, its powder isn't always the same color as the rock itself, and this powder can help identify the minerals in the rock. You obviously don't want to crush your rock if you think it's valuable, but that isn't necessary. You can conduct a streak test with a piece of unglazed porcelain – the back of a porcelain tile is ideal.
