Wikibooks is a useful resource if you're curious about a subject, but you couldn't reference it in academic work. It's also worth noting that although Wikibooks' editors are sharp-eyed, some less scrupulous contributors may plagiarize copyright-protected work by other authors. Some recipes, for example, appear to be paraphrased from well-known chefs.

Chicken breeding and genetics. Breeding chickens is the simple and easy practise of mating pairs or groups of chickens to producing chicks. Genetics is a hugely complicated subject, often made more so by the fact that it is rarely black or white, there are hundreds of shades of Gray or dominance in the middle.

1. Introduction. Livestock systems occupy about 30 per cent of the planet's ice-free terrestrial surface area (Steinfeld et al. 2006) and are a significant global asset with a value of at least \$1.4 trillion. The livestock sector is increasingly organized in long market chains that employ at least 1.3 billion people globally and directly support the livelihoods of 600 million poor smallholder ...

## Livestock production: recent trends, future prospects

In October 2015, the United Nations' International Bioethics Committee wrote that the ethical problems of human genetic engineering should not be confused with the ethical problems of the 20th century eugenics movements. However, it is still problematic because it challenges the idea of human equality and opens up new forms of discrimination ...

## Eugenics - Wikipedia

A dog stud service is the agreement and act of lending or using a specific stud dog so it can mate and breed a female dog. In exchange for the stud dog's semen will be received a cash sum, the first pick of the litter or anything agreed between both breeders. Dog stud service contracts are often used to clearly state the terms and conditions of such breeding.
