General Motors' 3.4L engine was a V6 engine manufactured from 1991 to 1997 for use in several General Motors vehicles, including the Pontiac Grand Prix, the Chevy Lumina and the Oldsmobile Cutlass Supreme.

### **GM 3.4L Engine Specs | It Still Runs**

The General Motors 60° V6 family of engines began with the 1980 Chevrolet 2.8 L V6 and continues to be produced today (if one doesn't count a larger block casting with larger bore center and new cylinder heads). Its use in the X-body cars leads some to refer to it as the X engine.. It is a 60° vee block with pushrod heads, except for a single DOHC member, the LQ1.

## **GM 3.4L-207ci-V6 Torque Specifications - TorkSpec ...**

The High Value engine family from General Motors is a group of Cam in Block or "Overhead valve" V6 engines. They use the same 60° vee bank as the 60° V6 family they are based on, but the new 99 mm (3.90 in) bore required offsetting the bores by 1.5 mm (0.059 in) away from the engine centerline. These engines (aside from the LX9) are the first cam in block engines to implement Variable valve ...

I am former gm tech years ago, now heavy truck. Thank you for the generous Tip / Donation. Answer: There is no special valve adjustments on this motor as was the case with the older Chevy small block. Rocker arms are just torqued to specs. The most important thing is that the push rods are installed correctly. They are different lengths.

The engine has EGR system (exhaust gas recirculation), which can reduce the number of harmful substances in exhaust gases. The engine has hydraulic tappets (no need for valve clearance adjustments ). The F14D3 engine has the timing belt. Pistons would bend valves if the timing belt broke. So be careful and replace it every 40,000 miles (60,000 km).
