### Good Vibrations History Record Production

Smile (stylized as SMILE) is an unfinished album by the American rock band the Beach Boys that was planned to follow their 11th studio album Pet Sounds (1966). It was to be a 12-track LP that drew from over 50 hours of interchangeable sound fragments, similar to the group's 1966 single "Good Vibrations".Instead, after a year of recording, the album was shelved and the group released a ...

### Smile (The Beach Boys album) - Wikipedia

The Smile Sessions is a compilation album and box set recorded by American rock band the Beach Boys, released on October 31, 2011 by Capitol Records.The set is the follow-up to The Pet Sounds Sessions (1997), this time focusing on the abandoned recordings from the band's unfinished 1966–1967 album Smile.It features comprehensive session highlights and outtakes, with the first 19 tracks ...

Then an object called a lacquer is placed on a record-cutting machine, and as it rotates, electric signals from the master recording travel to a cutting head, which holds a stylus, or needle. The needle etches a groove in the lacquer that spirals to the center of the circular disc. The imprinted lacquer is then sent to a production company.

A self-contained production line was erected in Plant 1 for the first real volume-production transmission. The capacities of the parent plant were so quickly exhausted, however, that ZF invested in the construction of a new building. Production moved into "Plant 2" at the beginning of 1962. By 1965, more than 340,000 4D56-3 units had been built.
