1 Green Innovation in China (pp. 1-4) China's energy system has significant global implications. Now the world's largest emitter of greenhouse gases, China has become the focus of scrutiny as the imperative to address climate change has gained international support. At the core of the climate change challenge is China's energy sector, the ...

In China, green shoots are appearing in China's pandemic-battered economy. Purchasing managers' indices reflect consecutive months of expanding manufacturing activity since the country emerged in late March from a two-month lockdown. Oil demand has rebounded to more than 90 percent of pre-pandemic levels.
