A concept for geometry in a topological space with finitely many elements without the use of infinitesimals is presented. The notions of congruence, collinearity, convexity, digital lines ...

(PDF) Topology in Raster and Vector Representation

Techniques from noncommutative differential and Riemannian geometry, in the sense discussed in Section 2, were applied to string theory, for instance in [7]. The role of noncommutative geometry in the context of T -duality was considered in very interesting recent work of Mathai and collaborators, [28], [29], [164].
