Back in 2018, as part of Release 11, we introduced the Automatic Risers feature to replace the vias functionality from older iBwave versions and help you with better cable management. Previously, whenever connecting cables between floors, iBwave software automatically created a via for you. Now, it creates a riser instead! Risers can handle multiple cable [...]

Risers vs Vias - New Feature How-to Guide | iBwave

The Capacity Planning Module provides background theory on capacity definitions and requirements. It also covers grade of service, quality of service, service types, subscriber mix, and capacity limits. It includes a chapter on how to design for specific user profiles in iBwave Design and run maps to validate the capacity requirements.
