Information Technology Auditing James A

In business and accounting, information technology controls (or IT controls) are specific activities performed by persons or systems designed to ensure that business objectives are met.They are a subset of an enterprise's internal control.IT control objectives relate to the confidentiality, integrity, and availability of data and the overall management of the IT function of the business ...

Information technology controls - Wikipedia

Overview. The audit opinion is intended to provide reasonable assurance, but not absolute assurance, that the financial statements are presented fairly, in all material respects, and/or give a true and fair view in accordance with the financial reporting framework. The purpose of an audit is to provide an objective independent examination of the financial statements, which increases the value ...
