Interpreting The Geologic Time Scale Answer Key The timescale and conditions for the formation and cooling of granites are totally consistent with a 6 000–7 000 year old earth and a global cataclysmic flood 4 500–5 000 years ago Contrary to evolutionary claims rock can form in a very short time as shown

Interpreting The Geologic Time Scale Answer Key

age of the Earth were started by geologists stating that the Earth was older than one thousand years. Stratigraphy is built on the concept that the present is the key to understanding the past. The same processes that create the rocks today were in operation in the past. This helps us reconstruct how the strata was deposited in the past.

STRATIGRAPHY - msucleus.org

James Hutton (1726-1797), a Scottish doctor, agriculturalist, and member of the Royal Society of Edinburgh, was one of the first advocates of the uniformitarian framework for interpreting earth history. To Hutton the earth was a giant machine composed of solid earth, oceans, and atmosphere. Understanding the present operation of the three-part system could be used by analogy to decipher the earth's history. The present was used as the key to the past. 1
