Note: Dirty cabin air filter mostly only leads to reduced cooling. If only hot air comes out of the air vents in your Passat, then the problem probably lies somewhere else. 2. Dirty or clogged condenser. Like the radiator, the air conditioning condenser on VW Passat sits at the front of the vehicle and is responsible for releasing the heat from the refrigerant into the ambient air.

If there's an issue with your TIPM or BCM, try troubleshooting those parts. They're on the same harness as the PCM, and can cause faults if they fail. If the problem is with your ECM, diagnose that carefully before proceeding. Check the Wiring Harness. The next thing to do is to check your PCM wiring harness for faults.
