5.4.1 Authentication of Clients by the Server. The CONNECT Packet contains Username and Password fields. Implementations can choose how to make use of the content of these fields.

A reported error / bug in MQTT Version 3.1.1 Plus Errata 01

MQTT 3.1 (2010) was coded as version 3 in the MQTT Connect control packet, which is used to connect to the MQTT server. When MQTT 3.1.1 was released in 2014, it was coded as version 4. To remove confusion, the standards group chose to use 5 as both the Connect control packet version number and the standard version number for the latest version.

MQTT Version 5.0 - What's New?

In 2013, IBM submitted MQTT v3.1 to the OASIS specification body with a charter that ensured only minor changes to the specification could be accepted. MQTT-SN is a variation of the main protocol aimed at embedded devices on non-TCP/IP networks, such as Zigbee.
