Nature's journal impact factor carries a long tail. [35] As with most other professional scientific journals, papers undergo an initial screening by the editor, followed by peer review (in which other scientists, chosen by the editor for expertise with the subject matter but who have no connection to the research under review, will read and critique articles), before publication.

For any journal to have an impact factor it must be tracked by Clarivate Analytics for two years (for more information on how impact factors are calculated, please see here).

Impact factors for journals : Springer Nature Support

Impact Factor is a measure of the importance of a journal. The impact factor (IF) is a measure of the yearly average number of citations to recent articles published in that journal. It is often used to compare journals of the same category. Higher the Impact factor, higher is the ranking of the journal.

SJR : Scientific Journal Rankings

Journal impact factors are influenced heavily by a small number of highly cited papers. In general, most papers published in 2013-14 received many fewer citations than indicated by the impact factor. Two journals (Nature [blue], PLOS ONE [orange]) are shown to represent a highly cited and less cited journal,

respectively.

Impact factor - Wikipedia

Most of the papers garnered fewer citations than the impact factor for their journal: 74.8% of Nature articles were cited below its impact factor of 38.1, and 75.5% of Science papers were cited...

Beat it, impact factor! Publishing ... - Nature News & Comment

Thus, the impact factor of a journal is calculated by dividing the number of current year citations to the source items published in that journal during the previous two years (see Figure 1). The impact factor is useful in clarifying the significance of absolute (or total) citation frequencies.

The Clarivate Analytics Impact Factor - Web of Science Group

SciGraph, the new Linked Open Data platform aggregating data sources from Springer Nature and key partners from the scholarly domain. Keeping up-to-date just got easier
Recommended is a personalised service that helps researchers to keep up to date with the latest research by suggesting relevant papers from all publishers, based on what has previously been read.

Springer Nature

The top 5% of journals have impact factors approximately equal to or greater than 6 (610 journals or 4.9% of the journals tracked by JCR). Approximately two-thirds of the journals tracked by JCR have a 2017 impact factor equal to or greater than 1. Impact Factors are useful, but they should not be the only consideration when judging quality.
