Methodology.

Ontology and Epistemology are words very commonly used within academia, and although they can seem daunting when first encountered, their meaning for NLP research is simple. Epistemology is concerned with the questions “What do you know?” and “How do you know it?” , whilst ontology is concerned with “What is there?” .

reality whereas epistemology is concerned with the general basis of that reality, including different methods of gaining knowledge. This is the main difference between ontology and epistemology, Both ontology and epistemology act as the foundation for our approach to a research question.

Difference Between Ontology and Epistemology | Ontology vs ...

Simply put, ontology relates to the assumptions we make about the nature of reality, epistemology sets out beliefs about how one might discover knowledge about that reality and methodology specifies the tools and techniques that we use in the conduct of our research. Critically, these three words form relationships to each other.
