### **GitHub - openemr/openemr: OpenEMR is the most popular open ...**

Welcome to the OpenMRS Wiki The OpenMRS Wiki is a community-maintained collection of documentation about our software and about our community. OpenMRS volunteers work hard to share knowledge and maintain this information, and we encourage you to help by fixing errors, updating knowledge, and adding comments or questions to pages.

### **Home - Documentation - OpenMRS Wiki**

Domains. Concept: Concepts are defined and used to support strongly coded data throughout the system Encounter: Contains the meta-data regarding health care providers interventions with a patient. Form: Essentially, the user interface description for the various components. Observation: This is where the actual health care information is stored. There are many observations per Encounter.

### **Data Model - Documentation - OpenMRS Wiki**

It turns out that they are considering handing off this code to the OpenEMR community so that will be a decent effort in terms of testing, documentation, and maybe thinking of ways we can move the code into the PHP codebase as discussed in point 3 (however, I still think a Docker will be needed because FHIR validation/parsing is much better in ...

### **OpenEMR and FHIR - OpenEMR Development - OpenEMR Community**

Perhaps a way to document these would be to standardize all the function headers and run them through a standard library documentation script. Then would have really nice documentation for developers (this would then likely lead to re-organization of libraries etc.). -brady OpenEMR

### **OpenEMR / Discussion / Developers: OpenEMR and Zend**

Definition. Health Level 7 (HL7) is an international standard for the transmission of medical data and the name of the organization responsible for maintaining and growing this standard (among other things).. See the HL7 definition on Wikipedia; HL7 in OpenMRS Available Message Parsers

### **HL7 - Documentation - OpenMRS Wiki**

If you need server software for the medical practice you administer, look no further than the open source OpenEMR.
