Past history provides recurrent warnings. Following its introduction in the United States in the 1950s, penicillin was available over the counter for almost 10 years before prescriptions were required. Thus, we can assume that a “core” population of antibiotic-resistant strains was established by the early 1960s in most industrialized nations.

Self-talk has been studied from the earliest days of research in experimental psychology. In sport psychology, the cognitive revolution of the 1970s led researchers and practitioners to explore the ways in which self-talk affects performance. Recently, a clear definition of self-talk that distinguishes self-talk from related phenomena such as imagery and gestures and describes self-talk has ...

Lessons from simple organisms. The remarkable effects of the typical 20–40% CR on aging and diseases in mice and rats are often viewed as responses evolved in mammals to adapt to periods of limited availability of food (Fontana and Klein, 2007; Fontana et al., 2010; Masoro, 2005; Weindruch and Walford, 1988).However, the cellular and molecular mechanisms responsible for the protective ...

For example 2 extra units of rapid-acting insulin would be predicted to lower the glucose from 350 mg/dL to 150 mg/dL. At the other extreme, in an insulin-resistant patient, BG levels may fall 5 to 10 mg/dL per unit or rapid-acting insulin can be used. Higher insulin doses may be needed with marked hyperglycemia due to underlying glucose toxicity.

Pharmacology is a branch of medicine, biology and pharmaceutical sciences concerned with drug or medication action, where a drug may be defined as any artificial, natural, or endogenous (from within the body) molecule which exerts a biochemical or physiological effect on the cell, tissue, organ, or organism (sometimes the word *pharmacon* is used as a term to encompass these endogenous and ...

Pharmacology - Wikipedia

Ideas fueled by energy can free up time which can then partly be used to create more ideas to free up more time. It is a positive feedback cycle, but with a limit. The fundamental scarce resource is time. There is only one Earth worth of space to colonize. Only one fossil-fuel store of energy to dig out.
