Programming Windows Fifth Edition By
Charles Petzold's "Programing Windows", Fifth Edition is of the first rank, on par with Tom Swan's "Mastering Borland C++ 4.5", which I also have. While Petzold's book was written using Microsoft's Visual C++ 6.0, Swan's was written, as its title implies, using Borland's C++ 4.5, which I have and use as my Windows Programming "bible".

The fifth edition goes back to the original unadorned title Programming Windows. I finished this revision in October 1998, five months after the June 1998 release of Windows 98. The book has a whopping 1479 pages and hard covers. The two Paul Yao chapters from the fourth edition are not included in the fifth edition. Nor is the chapter on DDE.

Programming Windows: One Book, Six Editions
this "10th Anniversary Edition" of Programming Windows is the best edition yet. Many other people at Microsoft (including some of the early developers of Microsoft Windows) also helped out when I was writing the earlier editions, and these fine people are listed in those editions.
