Step 1: Division is even in all the digits. We divide numbers where each of the hundreds, tens, and ones digits are evenly divisible by the divisor. The GOAL in this first, easy step is to get students used to two things: To get used to the long division "corner" so that the quotient is written on top.

How to teach long division: a step-by-step method

My son is beginning to learn division. He is having a hard time understanding the concept, so I decided to try out a few things to help him. I want to get him over the fear of it. We started by playing a simple game. I gave him 30 plastic beads and a mini muffin tin. He had to divide the beads between the slots evenly.
