My first Robin Cook book was Charlatans (2017) - read by George Guidall. An incredible book - so I've started listening to some of his older stuff like this one (Seizure). We've read all of Cook's medical "thrillers" (even his Egyptian mystery, the "Sphinx"), and would argue that some are a lot better than others. But along comes "Seizure", just possibly his best ever! A current affairs-type premise finds two intellectual doctors trying to save from impending financial ruin their stem-cell research company with a promising technology to grow disease-curing cells.
