6XD Sequential Gearbox | Sequential Racing Transmission

A sequential gearbox is similar to a manual transmission, but it's a bit different. In a car with a manual transmission, you shift the car through the gears in an "H" pattern. The top left position is first, and then you move straight down to second. ... In Formula One race cars, the shifters are located on either side of the steering ...

What is a Sequential Gearbox and How Does it Work? | Tim's ...

A sequential manual transmission is not to be confused with a "tiptronic" sort of automatic transmission. The tiptronic system may duplicate the shift lever motion of a sequential gearbox. However, because a tiptronic transmission is an automatic transmission at its core, it still has the torque converter and usually does not shift as quickly.
