Solutions to Assignment-2 Only submit the questions in red. 1.(a) For any two sequences f_n and g_n show that $\limsup_{n \rightarrow \infty} (a_n + b_n) \leq \limsup_{n \rightarrow \infty} a_n + \limsup_{n \rightarrow \infty} b_n$; unless the right hand side is of the form ∞ . Solution: Assume both the limsups are finite (the other cases are also similar). Let $A = \limsup_{n \rightarrow \infty} a_n$

Math 209 Assignment 2 — Solutions 1. Let $R = \ln(u^2 + v^2 + w^2)$, $u = x + 2y$, $v = 2x - y$, and $w = 2xy$. Use the Chain Rule to find $\frac{\partial R}{\partial x}$ and $\frac{\partial R}{\partial y}$ when $x = y = 1$. Solution: The Chain Rule gives $\frac{\partial R}{\partial x} = \frac{\partial R}{\partial u} \frac{\partial u}{\partial x} + \frac{\partial R}{\partial v} \frac{\partial v}{\partial x} + \frac{\partial R}{\partial w} \frac{\partial w}{\partial x}$

Assignment 2 — Solutions

7 nickels; 1 dime; 3 quarters; 2. Ask students to figure out in their heads how much money there is in the bag. 3. Ask several students to explain how they figured what the coins were worth (in my case, they totaled \$1.39). Record their answers on the board as they report. In my class, as Dylan reported, I wrote: $25 \times 3 = 75$; $75 + 10 = 85$; $7 \dots$

SOLUTIONS TO HOMEWORK ASSIGNMENT # 7 1. Determine the nature of all singularities of the following functions $f(z)$. (a) $f(z) = \cos 1/z$. (b) $f(z) = 1/z^2 \sin z$. (c) $f(z) = z e^{z^2} - 1$. Solution: (a) $z = 0$ is the only singularity. It is an essential singularity since the Laurent series expansion about $z = 0$, $\cos 1/z = 1 - \frac{1}{2!z^2} + \frac{1}{4!z^4} + \dots$,

If your handwriting is possibly illegible, be sure to hand in your assignment in some typed form. 1. Consider the following game in matrix form with two ...

Assignment 1: Sample Solutions

7.1 Introduction: Recall from Chapter 1 that solutions are defined as homogeneous mixtures that are mixed so thoroughly that neither component can be observed independently of the other. Solutions are all around us. Air, for example, is a solution. If you live near a lake, a river, or an ocean, that body of water is not pure H_2O but most probably a solution.
