If you're looking for a more traditional study guide that's based on taking practice questions, this is a good choice. It focuses on GED-style practice questions to get you ready for the test. A lot of the core skills on the science test are reading and math skills, so be sure you have science-based math and reading skills.

### GED Science Study Guide 2021 [GED Academy]

DNA is the nucleic acid that holds the genetic information of the organism. It is shaped as a double helix. DNA can reproduce itself and can synthesize RNA. A vesicle is a small cavity containing fluid. A ribosome is a tiny particle composed of RNA and protein in which polypeptides are constructed.

### Biology Practice Questions - Study Guide Zone

This study now adds an independent line of evidence to the genetic case for young-earth creation. Previous studies looking at DNA inherited through females reflected the recent origin of humanity at creation and then through Noah's son's wives at the Flood. This new study now shows that DNA inherited through males reflects the same timescale.
