The Mississippian Period in the midwestern and southeastern United States, which lasted from about A.D. 800 to 1600, saw the development of some of the most complex societies that ever existed in North America. Mississippian people were horticulturalists. They grew much of their food in small gardens using simple tools like stone axes, digging sticks, [...]

The Caddo Nation is a confederacy of several Southeastern Native American tribes. Their ancestors historically inhabited much of what is now East Texas, Louisiana, and portions of southern Arkansas and Oklahoma. They were descendants of the Caddoan Mississippian culture that constructed huge earthwork mounds at several sites in this territory, beginning about 800 CE.

Known as Coosaponakeesa among the Creek Indians, Mary Musgrove served as a cultural liaison between colonial Georgia and her Native American community in the mid-eighteenth century. Musgrove took advantage of her biculturalism to protect Creek interests, maintain peace on the frontier, and expand her business as a trader. As Pocahontas was to the Jamestown colony [...]

Archaeology helps us to appreciate and preserve our shared human heritage. It informs us about the past, helps us understand where we came from, and shows us how people lived, overcame challenges, and developed the societies we have today. The focus of archaeology has changed over the years. Today, archaeologists study everything

Archaeology is fundamentally the study of humanity and its past. Archaeologists study things that were created, used or changed by humans. They do this by studying the material remains, in other ...

## **Archaeology - News and Scientific Articles on Live Science**

In the most general sense, archaeology is the study of human societies for which no or few written records exist, through the careful recovery and analysis of the material remains--the "artifacts"--of these extinct cultures. Archaeology is a branch of anthropology, which involves other types of humanistic and scientific studies of human cultures.

Earthworks in North America include mounds built by Native Americans known as the Mound Builders. Ancient people who lived in the American Midwest commonly built effigy mounds, which are mounds shaped like animals (real or imaginary) or people. Possibly the most famous of these effigy mounds is Serpent Mound. Located in the Ohio, this 411-meterlong earthen work is thought to memorialize ...
