It is instead a reflection in favor of a critical Digital Humanities, that is a specifically humanist take on computational analysis that Dobson considers missing in much Digital Humanities research and that he fundamentally links with the notion of suspicion.

## **The Digital Humanist A Critical Inquiry**

We know digital transformation is no longer an option for today's organizations—it's a requirement. End-users have come to expect an easy, digital-native experience, whether they are ordering a pizza or automating an entire network infrastructure, which is why businesses and governments are throwing trillions of dollars at new technologies and related services.

## **The Secret to Digital Transformation is Human Connection ...**

Digital humanities incorporates both digitized (remediated) and born-digital materials and combines the methodologies from traditional humanities disciplines (such as rhetoric, history, philosophy, linguistics, literature, art, archaeology, music, and cultural studies) and social sciences, with tools provided by computing (such as hypertext, hypermedia, data visualisation, information retrieval, data mining, statistics, text mining, digital mapping), and digital publishing.
