Hyman G. Rickover (January 27, 1900 – July 8, 1986) was an admiral in the U.S. Navy. He directed the original development of naval nuclear propulsion and controlled its operations for three decades as director of the U.S. Naval Reactors office. In addition, he oversaw the development of the Shippingport Atomic Power Station, the world's first commercial pressurized water reactor used for ...

reverse by assembling the solemn pronouncements of highest authority about what could not be done and could never happen." An entertaining quasi-counterpoint to the adage being investigated appeared in the popular 1961 children's book "The Phantom Tollbooth".

## **It Always Seems Impossible Until It's Done - Quote Investigator**

I'll address the rest when I get some more time, but I chuckled when you mentioned Rickover in your reply about standards. Rickover was well known for being obsessive about high standards and holding men and equipment to them. He rubbed people the wrong way in yesterday's navy. I can only imagine how long he'd last in today's "woke" "safe space ...

## **If Nuclear Power Is So Safe, Why Are We So Afraid Of It?**

I've spent a big part of my recent life critiquing the F-35 mistake-jet program (without effect), which does have some intelligent design but under a program that is almost entirely based upon optimism. . .One could also apply that to US foreign policy, no? . . .So Rickover was completely correct on this, as on other matters.
