from any cell on the same row of the range.

Vlookup syntax and Definition - Explained!

Most names in Excel apply to the entire workbook, so you don't need to specify the worksheet's name when using named ranges. If the named range is in another workbook, put the workbook's name before the range name, for example:
=VLOOKUP(A2, 'Price List.xlsx'!Prices_2020, 3, FALSE) Such formulas are far more understandable, aren't they?
