Click to Enlarge. The graph above plots the beam quality, M^2 , of 68 TC12 triplet collimators and 68 aspheric collimators. The measured beam qualities have been binned into increments of 0.02. For example, the two bars between 1.00 and 1.02 represent the number of units tested that had M^2 values between 1.00 and 1.019.. This data shows that beam quality when using a triplet collimator is ...
